Additions

Remodeling

For over 25 years founding principal Steven J Mooney has honed his expertise for excellence, unique design and sustainable principals. He is a Licensed Architect in Minnesota and Wisconsin and a member of the AIA (American Institute of Architects). Luna Architecture's work has an integrated and balanced approach to good design with lasting value that respects your budget and vision.

At the heart of our success is design that creates a tailored nurturing environment while applying state of the art building science. We design using time tested comforts of home, taking advantage of site and views. We create spatial qualities embracing daylight, materials and textures to suite your style and comfort.

The most successful projects come from clients that are enthusiastic and engaged with a blend of patience, serious sense of budget, humor and a playful open mind to possibilities.
